

# Approval Process Document to Support the Generic Regulation

The following requests for input were sent out to all CA's by e-mail:

Date: November 21, 2003

**Re: Generic Regulation Approval Process Feedback - Deadline Extended to December 9**

Hi folks,

I sent out a copy of the Final Draft of the Approval Process Document last week and asked for comments by November 24 in an attempt to meet the mailing deadline for the Conservation Council meeting. It has been decided that this document will not be taken to the December 7/8 Conservation Council Meeting and therefore, we do not need to be in such a rush to get your feedback. The key things to note are as follows:

- 1) The deadline for providing comments is extended to Tues December 9
- 2) Comments will be summarized and reviewed with the working group and the next steps for finalizing this document will be determined based on the feedback received
- 3) I would like to hear from your CA whether it be detailed comments, general concerns, general satisfaction or whatever, by the deadline.

To those of you that have already commented, thank you very much for your valuable feedback. If you wish to provide additional comments now that you have additional time, please go ahead.

My previous e-mail message and the attachment are included again with this e-mail for convenience.

**Re: Generic Regulation Approval Process Feedback - Deadline November 24**

Please find attached a copy of the Final Draft of the Approval Process Document. This document has been developed to assist Conservation Authorities with the preparation and submission of a local regulation that complies with the Generic Regulation. The document deals specifically with the approval process and it is one in a series of guideline documents that are being developed to assist Conservation Authorities with the new regulatory framework.

This final draft is provided for your review prior to it being presented to Conservation Ontario Council at their meeting on December 8th.

We would appreciate any comments you wish considered in finalizing this document by 4:30 on November 24th in order to ensure that they are incorporated in the product that will be brought forward for adoption.

Please provide your written comments or marked up copy back to me. Questions can be directed to myself or any of the following members of the working group:

Steve Knechtel - Cataraqui Region  
Suzanne McInnes - Niagara Peninsula  
Chris Hibberd - Credit Valley  
Fred Natolochny - Grand River  
Janet Wong - Hamilton Region  
Laurie Nelson - Toronto and Region  
Jill McColl - Central Lake Ontario

Thank you in advance for your feedback,

Jeff Brick
